Welcome to the World, It's 2020

All they need is rain the animals are in pain, the governments to blame, it's all part of their game

So how much can we do, to help the Kangaroos, the site of a Koala burning makes me feel the worlds not turning

Welcome to the world it's 2020,

Everything that's happening now is plenty

We don't want any more, problems at our door

If they try we're going to ignore

As the numbers rise, for some it's genocide, the animals run and hide, all they do is lie, all we do is sigh

Welcome to the world it's 2020,

Everything that's happening now is plenty

We don't want any more, problems at our door

If they try we're going to ignore

We can't change the world over night, but we could change the world if we tried

Welcome to the world
Welcome to the world
Welcome to the world it's 2020

Welcome to the world it's 2020,

Everything that's happening now is plenty

We don't want any more, problems at our door

If they try we're going to
If they try we're going to
If they try we're going to ignore
